1. Executive summary

FTS Bulgaria provides completely localized version of Dynamics 365 BC, translated into Bulgarian language, and in consistency with the requirements of Bulgarian legislation. The system offers possibility for adjustment, publishing and printing of financial reports and statements/references such as Trial balance, VAT ledgers and declaration, including VIES, INTRASTAT declarations and other documents, all required by Bulgarian legislation and accounting standards.

The localization package includes the following functionalities:

- Registration of purchase and sales documents in accordance with the legislation requirements
- VAT sales and purchase ledgers
- Monthly VAT and VIES declaration
- VAT protocols creation and printouts
- Export of VAT ledgers and declarations
- INTRASTAT
- Posted sales and purchase documents voiding
- Advance payments from customers
- Trial balance register
- Fixed assets reports (depreciation plan for corporate tax and accounting purposes)
- Sales invoices and credit memos print forms

When creating a new company, it is necessary to activate the localization package for Bulgaria. Activation is performed in the **General Ledger Setup** page from the menu **Actions, Functions - Change BG Localization Activation Status**.

After activation it is necessary to check the status in the **BG localization Settings** section.

2. VAT functionality

The VAT functionality, as part of the localization package for Bulgaria, meets the requirements for VAT statutory reporting.

The main menu for working with the functionality is in the role center “Accountant”.

2.1. VAT setup

2.1.1. General setup

The initial setup is in page **BG, VAT and VIES setup**

This table contains data on specific localization setup regarding: checks of VAT registration numbers, bank codes, VAT, VIES and INTRASTAT, setup of VAT files export (names of files), standard VAT subject for the purposes of VAT ledgers for sales and purchase documents.

- **Checks**

- **Skip Check for Identification No** - check this field, if the check for Identification No. should not be activated.
- **Foreigner VAT reg. No.** - enter a standard foreigner VAT reg. number (9999999999999999). The system checks if the VAT number, entered in the vendor or customer card, is the same as the number, entered in this field.
- **Foreigner Identification No.** - enter a standard foreigner Identification No. (9999999999). The system checks if the identification number, entered in the vendor or customer card, is the same as the number, entered in this field.
- **Posting Purchase Invoice** - Specifies whether it is allowed posting a purchase invoice with the same document number and different date.

- **VAT export setup**

- **Sales VAT subject** - define the standard VAT sales subject for the purposes of the VAT sales ledger (length: 30 symbols). If no specific VAT subject is entered in the sales document before posting (invoice/credit memo/sales protocol), the VAT subject for the VAT sales ledger is taken from this field.
- **Purchase VAT subject** - define the standard VAT subject for the purposes of for the VAT purchase ledger (length: 30 symbols). If no specific VAT subject is entered in the purchase document before posting (invoice/credit memo), the VAT subject for the VAT purchase ledger is taken from this field.
- **Incl. sales with customs declarations** - if this option is enabled, the document will be included in the sales VAT ledger, if you fill in the SAD number in the sales document.
- **Incl. purchases with customs declaration** - if this option is enabled, the document will be included in the purchase VAT ledger, if you fill in the field SAD number in the purchase document.

- **VAT Label**

- **Authorized Person** - enter the ID/name of the company representative (the value of this field is used in the exported file with the VAT monthly declaration)

- **VAT registration date** - enter the company registration date under the VAT regime.
- **VAT registration expiry date** - enter the date of termination of the registration under the VAT regime
- **VAT Declarations**

VAT Declarations

Declaration Signed-Off By Job Position

Local properties

BG Country/Region Code Local Language code

- **Declaration signed-off** - enter the name of the company representative, submitting the VAT files. The value of this field is taken for the print form of the VAT monthly ledgers.
- **Job Position** - enter the job position of the company representative. The value of this field is taken for the print form of the VAT ledgers.
- **Local properties**
 - BG country/region code – enter the code of Bulgaria (BG) – for system purposes.
 - Local language code – enter BGR. The setup is related to the print forms in Bulgarian.

2.1.2. VAT combinations

Here only the fields, related to the localization package, will be discussed.

Specific purchase par.163a	Document with header info only	Calculate VAT for Personal Use	Tran... Type	Purch... VAT Refund Type	VAT Clas... Code	Cor Sale VAT Acc
	☐	☐	Sales	Full Ref...	03	
	☐	☐	Sales	Full Ref...	06	
	☐	☐	Sales	Full Ref...	00	
	☐	☐	Purch...	No Ref...	00	
02	☒	☐	Purch...	Full Ref...	00	
	☐	☐	Purch...	Full Ref...	00	
	☐	☐	Purch...	Full Ref...	00	
01	☒	☐	Purch...	Full Ref...	00	
	☐	☐	Purch...	Full Ref...	00

	☐	☐	Purch...	No Ref...	00	
	☐	☐	Purch...	No Ref...	00	
	☐	☐	Purch...	No Ref...	00	

The main fields for the setup of the VAT combinations for the Bulgarian localization are:

- **Transaction type** – options: **Purchase, Sales, Both**. Option **Both** is used for the VAT protocols
- **Purchase VAT refund type** – options: **full refund, partial refund, no refund, annual corrections**.

This column defines in which columns the transaction will be included:

Full refund - the sums will be included in the columns for VAT base and VAT amount.

No refund - the purchase invoice with a VAT combination with **No refund** will be included in the column for purchases with no refund.

Partial refund – when **Partial refund** is selected, the sums will be included in the columns for transactions with **Partial VAT credit**.

Annual correction- used for column for transactions under art. 73, p. 8 in the purchase VAT ledger.

- **Calculate VAT for Personal Use** - used for protocols for private use of assets. The document is included in the VAT sales ledger.
- **Vat classification code** – if no code is entered, enter code 00.

Code	Description	Comments
00	Local transactions	
01	Other Cases Normal VAT	For VAT for private use.
02	Purchases according to art. 82, p.2-5	Used in VAT purchase protocols
03	Subject to 0% VAT acc. to Ch.3 of the VAT Act	The transaction is included in column 19 (sales under chapter 3 of the VAT Act)
04	Subject to 0% VAT, acc. to art. 140,146 and 173, p.1 and 4 of the VAT Act	The transaction is included in column 21 (deliveries with VAT rate 0% по чл. 140, чл. 146, ал. 1 и чл. 173 ЗДДС)
05	Sales subject to 0% VAT, acc. to art.21, p.3 and art. 22-24 of the VAT Act	The transaction is included in column 22 (Tax base for supplies of services under Art. 21, para. 2 of the VAT Act, with a place of performance on the territory of another EU Member Country)
06	Transactions acc. to art. 69, p.2 of the VAT Act	Used for Sale type and Both type. Code 06 in the sales journal is included in column 23 (Tax base of supplies under Article 69, paragraph 2 of the VAT Act, including Tax base of supplies under the conditions of distance sales, with a place of performance in the territory of another EU Member Country). In the purchase ledger, when it is a protocol and is entitled to a full tax credit, it reflects in columns 10 (TO the received deliveries, VAT, the received deliveries art. the received deliveries, used for making deliveries under art. 69, para 2 of the VAT Act with the right to a

Code	Description	Comments
		full tax credit) and 11 (VAT with the right to a full tax credit). In the purchase journal, when entitled to a partial tax credit - in columns 12 (TO the received supplies, VAT, received supplies Art. 82, para 2-5 of the VAT Act, imports, as well as TO the received supplies used for making supplies under Article 69, paragraph 2 of the VAT Act with the right to a partial tax credit) and 13 (VAT with the right to a partial tax credit)
07	Subject to 7% VAT charge	It is related to taxable supplies at a rate of 7 or 9%. It is reflected in column 17 of the sales ledger.
08	Intra-community purchases	For VAT purchase protocols for intracommunity purchases
09	Distant sales effected within the territory of another EU member country	Code 09 in the sales journal is included in column 23 (Tax base of supplies under Article 69, paragraph 2 of the VAT Act, including Tax base of supplies under the conditions of distance sales, with a place of performance in the territory of another EU Member Country)
10	Sales and Intra-community acquisitions exempt from VAT	The transaction goes to column 24 of the sales ledger (Sales and Intra-community acquisitions exempt from VAT).
11	Import	Only for VAT purchase ledger for import from non-EU countries When in combination Without the right to a tax credit in the purchases, it reflects in column 9 (TO and tax on supplies received, VAT, supplies received under Article 82, paragraphs 2-5 of the VAT Act and the import without tax). In the purchase ledger, when it is a protocol and is entitled to a full tax credit, it reflects in columns 10 (TO the received deliveries, VAT, the received deliveries, used for making deliveries under art. 69, para 2 of the VAT Act with the right to a full tax credit) and 11 (VAT with the right to a full tax credit). In the purchase ledger, when it is entitled to a partial tax credit in column 12 (TO the received deliveries, VAT, the

Code	Description	Comments
		received deliveries Art. 82, para 2-5 of the VAT Act, the import, as well as TO the received deliveries, used for making of supplies under Article 69, paragraph 2 of the VAT Act with the right to a partial tax credit) and column 13 (VAT with the right to a partial tax credit)
12	Intermediary in triangular operations	For deliveries as Intermediary in triangular operations
13	Intra-community sales	Related to sales ledger and column 20 (TO supplies with 0% Intra-community sales)
50	VAT protocol for fuel compensation	In the page VAT posting setup, in the Edit mode of the VAT combination for the compensation, in the General section there is a field Compensation protocol, which must be checked. Based on this check, when a VAT ledger is generated, a VAT protocol with these combination will enter with code 50.
83	Fuel compensation sales	In the page of BG, VAT and VIES settings in the VAT label section, a field "Compensation customer code" has been added. In this field, you must indicate the client for whom the invoices will be issued with the fuel that will be compensated. The sales of this customer in the VAT ledger will be entered with code 83, they will be entered document by document, because they use invoice numbering.
84	Delivery of bread	In the VAT classification code, 00 is filled in for the VAT combination, and in the column "Specific purchase par. 163a" code 07 is filled in. In this case, the type of the document will be changed to 84 in the VAT ledger
85	Delivery of flour	In the VAT classification code, 00 is filled in for the VAT combination, and in the column " Specific purchase par. 163a ", code 08 is filled in. In this case, the type of document will be changed to 85 in the VAT ledger
90	Only in VAT Sales Ledger	When posting a VAT Sales protocol with the relevant VAT combination - this

Code	Description	Comments
		record will be entered only in a sales ledger with code 09 and only the amount of VAT is recorded in column 12 (VAT charged for purchases on c.11 and (20%) according to other cases), without base.
92	Purchases according to art. 82, p.2-5	Used in the VAT protocols described below
98	Intra-community purchases	Used in the VAT protocols described below

2.2. VAT protocols

The VAT protocols are created from page „Purchase VAT protocols“ and „Sales VAT protocols“. The posted protocols could be found in pages „Posted Purchase VAT protocols“ and „Posted Sales VAT Protocols“. You can see them in the **Accountant** role center:

- **Posted VAT protocol** – copy from a posted VAT protocol
- **Posted invoice** – copy from a posted purchase invoice
- **Posted credit memo** – copy from a posted purchase credit memo
- **Ledger entries** – copy from entries, created in **General journal**.

Include header – mark this field, if the data from the selected document header have to be used. If **Ledger entries** is selected, the header has to be filled in manually.

Compress lines – if the field is not marked, the lines of the posted document are copied to the protocol. If the field is marked, the lines are compressed into one line.

After the document is selected, press OK and the data is filled in the protocol.

In the VAT protocol header, fill in **Composed by** and **Ground for issue**.

You can also fill a **VAT description** field. The description is filled in which is reflected in the VAT Ledgers in the column VAT description. If left blank, it will be populated with the value of Sales VAT Subject/Purchase Vat Subject VAT fields from page BG, VAT and VIES setup;

VAT protocols can be created for several documents. In order to use this functionality, from the list of the protocols choose the button Create Purch. VAT protocol.

- **Document date** - enter the VAT protocol document date. Valid for all protocols that will be issued.
- **Posting date** – enter the VAT protocol posting date. Valid for all protocols that will be issued.
- **VAT date** – if left empty, the field will be filled in with the date of the copied posted document

- **Create from invoices** – if this option is marked, the system will create the invoices from the posted purchase invoices
- **Create from credit memos** – if this option is marked, the system will create the invoices from the posted purchase credit memos
- **New protocol per document** – when selecting this option, separate protocols will be created for each invoice / credit memo. Otherwise, the system will summarize the invoices and CMs for each vendor in one protocol.
- **Compress lines** – if this option is checked, the system will summarize all lines of the invoice or CM in one line. Otherwise, all lines of the source document will be copied to the protocol.
- **Ground for Issue** – if a ground for issue is selected from the list, it will be populated in the created VAT protocols.
- **Skip the EU check for creation VAT Protocol** – if the toggle is On VAT protocols for non EU vendor's documents will be created.
- **Create protocol for BG contragent** - when this option is marked the tool will create VAT protocols for the selected document types issued by local (bulgarian) vendors.
- **Get Dates from Document** – if this option is checked, the system takes the document date and create the protocols with invoices dates.
- **Get Ground for Issue for document** – if this option is checked, the system takes ground for issue from the invoice

Vendor, Invoice and **Credit Memo** help to further filter the documents. For example, you can specify in the Filter **Vendor**, VAT business posting group with the value that applicable for EU suppliers (VEND EU). This will filter only those documents that are from EU vendors.

The protocols, created with the action **Create Purch. VAT Protocol**, are found on the page **Purchase VAT Protocols**.

The system offers the possibility of group posting of the created VAT protocols, which is done with the button **Post Batch**.

← Purchase VAT Protocols

Document Type	No. ↑	Posting Date	VAT Date	CV No.	Name	Amount	Original Doc. Type	Original No.
Purchase	VPR000000...	5/12/2022	5/12/2022	V0008	тест EC	100.00		
Purchase	VPR000000...	5/12/2022	5/12/2022			0.00		
Purchase	VPR000000...	6/10/2022	6/10/2022			0.00		
Purchase	VPR000000...	6/21/2022	6/21/2022	V0008	тест EC	1,955.83	Invoice	PI17-
Purchase	VPR000000...	6/21/2022	6/21/2022			0.00		
Purchase	VPR000000...	5/13/2022	5/13/2022	V0008	тест EC	195.58	Invoice	PI17-

The functionality has no need of additional options to post all protocols to invoices with date of the invoice.

Once the protocols are posted, in the list of posted invoices and credit memos, the system automatically marks the documents for which VAT protocols are issued. This avoids the re-generation of protocols for these documents.

2.2.3. VAT combinations in VAT protocols

The VAT combination defines in which columns of the VAT ledgers the protocol will be included.

ZVAT PROT	BPAX		PROT	20	Full VAT		70906										Sales	Full Refund	00	

When the protocol has to be included in the VAT purchase ledger with no VAT refund, and the VAT amount has to be included in this sum, it is necessary to select a combination, that has VAT classification codes 98 and 92, for which “No refund” is selected. In this case only for these two codes the amount, including the VAT amount, will be included in the VAT purchase ledger. The columns in the VAT sales ledger are similar to those for code 02 and 08.

2.2.4. VAT protocol included only in the VAT Sales Ledger

When a VAT protocol should be registered only in the VAT Sales Ledger we can use the functionality of VAT for private use of assets, described in this document. The protocol will be included only in the VAT Sales Ledger. It is necessary to set a new VAT combination, which should be marked for personal use, as well as the protocol itself to be marked as a protocol for personal use of assets.

Vat Classification code 90 is also used for these cases. When posting a VAT Sales protocol with the relevant VAT combination, this record will be entered only in a sales ledger with code 09 and only the amount of VAT is recorded in column 12 (VAT charged for purchases on c.11 and (20%) according to other cases), without base.

2.2.5. Voiding VAT Protocol

When the VAT protocol has to be voided, go to the posted VAT protocol, choose Actions - Functions-Voiding VAT Protocol.

Reversing GL entries are posted, and the protocol is included in the VAT ledgers with 0 amounts.

Reversing GL entries are posted with the selected voiding date. If the voiding date is in the reporting month the protocol is included in the VAT ledgers with 0 amounts. But if the voiding date is in the next month the reversing entries will be included in the VAT ledgers for the next month with negative amounts.

2.2.6. Reversing VAT protocol (credit protocol)

When you create a reversing VAT protocol, the field Correction has to be marked. When the protocol is created from a posted purchase credit memo, the field is marked automatically.

2.2.7. VAT protocols for goods in storage

For **VAT protocols for goods in storage**, a combination of a **VAT Bus. Posting Group** and a **VAT Prod. Posting Group** is created on the **VAT Posting Setup** page, for which the fields are filled in as follows:

- **VAT Identifier** - 8A
- **Specific purchase par.163a** – contains one of the following values: 51, 53, 54, 58

The top screenshot shows the 'VAT Posting Setup' page with the following table:

VAT Bus. Posting Group	VAT Prod. Posting Group	Description	Bloc...	VAT Identifier	V. %	VAT Calculation Type	Unrealized VAT Type	Sales VAT Acco...	Sal... VAT Un... AC...	Purc... VAT Acco...	Purch. VAT Unreal. Account	Reverse Chrg. VA Acc.
→ ZVAT PROT	8A-51		☐	8A	0	Full VAT		*		45310		45320

The bottom screenshot shows the 'VAT Posting Setup' page with the following table:

VAT Bus. Posting Group	Re... Ch... VAT Un...	VAT Clause Code	EU Service	Tax Category	Specific purchase par.163a	Doc... with Hea... info	Transaction Type	Purchase VAT Refund Type	VAT Classification Code	Corr. Sales VAT Account	Calc VAT for Pers
→ ZVAT PROT			☐		51	☐	Purchases	No Refund	12		

The **VAT protocol for goods in storage** shall be included only in the **VAT Purch. Ledger** with Document Type **05** and with a code in column (8a) Purchase by par.163a, and the taxable amount shall be reflected in column (9).

The columns in the **VAT Purch. Ledger** must be filled in as follows:

- **Document type** – 05
- **Column 8A** – contains one of the following values: 51, 53, 54, 58
- **Column 9** – contains the taxable amount of the document

2.3. VAT on customs declaration

VAT on customs declaration is posted in General Journal. In the General Journal, fill in the following fields:

- **GL account** - select the account for VAT on purchase
- **Posting date**
- **SAD No.** - Customs declaration number
- **General posting type** – Purchase;
- **Amount** – amount of VAT on the customs declaration
- **VAT subject** – if not filled in, the transaction will be included with subject Purchase in the VAT purchase ledger
- **VAT Business posting group**– ZVAT MD (the VAT Business posting group for VAT on customs declarations);
- **VAT product posting group** – VAT20

In the VAT purchase ledger, the transaction is included as a document type 07.

2.4. VAT ledgers and VAT declaration

In accordance with the Bulgarian tax law, the following VAT statutory reports are submitted to tax authorities on a monthly basis:

- VAT declaration

- VAT Purchase ledger
- VAT Sales ledger
- VIES Return

VAT purchase and sales ledgers are books, that include each taxable sales or purchase transaction with a posting date in the specified month, for which the ledgers are created.

VAT ledgers have a set of mandatory data that are to be entered for every transaction – invoice number, document type, invoice date, customer/vendor name and VAT number, transaction description, VAT base, and VAT amount.

The sales/purchase document tax base amount and tax amount are included in different columns of the VAT ledgers, depending on the tax law articles compliance.

Some transactions should be excluded from VAT ledgers (e.g. purchases from non-EU countries, that are included in the VAT purchase ledger with the customs declaration number after posting the VAT on customs declaration).

2.4.1. VAT ledgers creation

The posting date of the document defines in which monthly VAT ledgers the transaction will be included. To create a new VAT ledger, go to the main menu of role center Accountant, section VAT Reporting.

A new ledger can be created from the Purchase Ledger List or the Sales Ledger List page, and an existing ledger can also be viewed, edited, deleted, or printed.

VAT Sales Ledger List

Search	+ New	Edit List	Delete	Edit	View	Print	Open in Excel	More options
Type ↑	Period Start Date ↑	Description	Created	Exported	Authorized Person			
→ Sales	1.6.2021 r.	Sales VAT Ledger by June 2021	☒	☐				
Sales	1.7.2021 r.	Sales VAT Ledger by July 2021	☒	☐				

Creating a new ledger is done by selecting the action **New**. A window opens in which it is necessary to enter the first day of the respective month for which the ledger is created - in the field **Period Start date**.

→ 10000	5.7.2021 r.	01	0000000037	0000000037	195,58	0,00	999999999		sales	195,58	0,00	0,00
20000	5.7.2021 r.	01	0000000038	0000000038	200,00	40,00	BG2025331...		sales	200,00	200,00	0,00
30000	5.7.2021 r.	01	0000000039	0000000039	0,00	0,00	999999999		sales	0,00	0,00	0,00
40000	5.7.2021 r.	81	9000000003	9000000003	1 000,00	0,00	BG2025331...		sales	0,00	0,00	0,00
50000	1.7.2021 r.	09	0000000012	0000000012	-70,00	-14,00	999999999		sales	-70,00	0,00	-70,00

The entries included in the ledger are those that are posted in the system at the time of creating the ledger and their posting date is within the period for which the ledger is created. In case, after generating a ledger, more documents for the period are posted, it is necessary to generate the ledger again with the Create button.

The fields in the VAT ledger that provide information about the status of the ledger are the following:

- Created - indicates that the ledger has created rows with data from the posted documents.
- Exported - indicates whether the ledger data was exported in files for submission to the tax administration. A ledger marked as Exported cannot be changed.

- **Status** - indicates the status of the ledger: Open or Started. Status Open means that the Create action can be performed, and in case the ledger has already been created, the data in it can be changed. Status Started means that the ledger data cannot be changed and the Create action cannot be performed on it.

For each VAT ledger certain actions can be performed. You can find them in menu Actions - Functions.

- **Create** - creates lines in the ledger with data from the posted documents. For one log, the action can be performed repeatedly. Each execution of the action removes the existing rows in the log and reloads them. In order for the action to be performed, the status of the ledger must be Open. Status Open for a ledger that has already acquired the status Started is obtained with the action Reopen.

In case the Create action is performed for a ledger that has the status Open, but is marked as Exported, then the system displays a warning message that the log has already been exported.

- **Check** - checks the created ledger for errors that would prevent the acceptance of the ledger by the tax administration. Example of error: Contragent ID field is not filled in.

- **Release** - changes the status of the ledger from Open to Released. For a ledger with Status Released, no changes can be made and the Create action cannot be performed.

- **Reopen** - changes the status of the ledger from Released to Open. Only for a ledger with the status Open, the Create action can be performed.

After a ledger is exported in a file with a format for submission to the tax administration (described in item 2.4.4. Creating VAT files), the ledger is automatically marked as Exported. In addition, in the ledger list and in the ledger itself, its status is changed to Released.

If corrections are needed in an already exported ledger, it must be opened again with the Reopen action, then re-created or corrected. Once the adjustments have been made, new VAT files should be created for the ledger.

When a ledger is selected, Statistics related to it is displayed on the right side of the screen, where summary information about the entries included in the ledger can be obtained.

Sales VAT Ledger File Name PRODAGBI.TXT

Purch. VAT Ledger File Name POKUPKI.TXT

VAT Declaration File Name DEKLAR.TXT

VIES Declaration File Name VIES.TXT

VIES Declaration File Type Fixed Column Length

Schedule...

OK

Cancel

The fields for the file names are filled in automatically with values, according to the requirements for their submission to the tax administration:

- PRODAGBI.TXT – VAT Sales ledger
- POKUPKI.TXT – VAT Purchase ledger
- DEKLAR.TXT - VAT declaration
- VIES.TXT - VIES Declaration

By selecting the OK button, one archive file is created that contains all marked diaries and declarations.

Once the export files for the ledgers are generated, the system automatically marks these ledgers as Exported. Files for VAT ledgers and declarations can be generated repeatedly if necessary to correct the data.

2.5. VAT for private use of assets

2.5.1. General terms of the VAT for private use of assets

The rules for VAT for private use of assets are applied according to Art. 6, para. 3, item 1 and Art. 9, para. 3, item 1 of the VAT Act and the need for VAT registered companies to declare the tax on the assets used for personal needs when submitting the monthly declaration and the ledgers for purchases and sales to the tax administration.

The VAT for private use of assets is charged by issuing a protocol not later than 15 days from the date on which the tax has become due - Art. 117, para. 1, item 3 of the VAT Act.

The protocol should contain the following details:

- number and date;
- the name and the identification number under Art. 94, para. 2 of the registered vendor;
- the quantity and type of goods or type of service;

- the date of occurrence of the tax event on the supply;
- the tax base;
- the tax rate;
- the grounds for charging the tax by the company - art. 82, para. 1 of the VAT Act;
- the amount of tax.

In Art. 80 of the VAT Act, additional requirements are set regarding the protocols, such as permanently entered details, numbering and cancellation and storage.

The report shall be included in the sales journal with document code (09), the amount of tax charged being reflected in column 16 - Tax charged on supplies of goods or services for personal use.

The amount of the tax should be included in determining the result for the respective tax period in the monthly VAT declaration under Art. 125 for this tax period in cell 23 - Tax charged on supplies of goods or services for personal use.

When companies choose to use assets for personal needs, in Dynamics 365 Business Central it is necessary to follow the steps described below.

2.5.2. Setup of VAT Business and Product posting groups in VAT Posting Setup for VAT for private use of assets

In **VAT posting setup**, the following fields are set up:

→ ZVAT PROT	VAT-LICHNI	ДДС лични ...	PROT	20	Full VAT	45320	60990	45320		☐		☐	☒	Sales	Full Refu...	01	

The combination of the VAT business posting group and VAT product posting group has the following parameters:

- **VAT calculation type** - full VAT
- **VAT %** - 20;
- **Sales VAT account** – xxxxx (the account for VAT on sales)
- **Purchase VAT account** – xxxxx (an expense account for the VAT paid for private use of assets);
- **Transaction type** – Sales;
- **VAT classification code** – 01;
- **Calculate VAT for personal use** - ☒

Note: When posting documents (VAT protocol) with this combination, the amount of VAT will be reflected in column 16 – VAT charged for purchases of goods or services for personal needs of the Sales Ledger and in cell

23 - VAT charged for purchases of goods or services for personal needs of the VAT monthly declaration.

There must be no posting groups in the account card referred to as "VAT Purchases Account" in VAT Posting Setup.

2.5.3. Setup in VAT Purchase Protocol

For incurring VAT for private use a VAT purchase protocol is created. In the VAT purchase protocol header a new field "Calculate VAT for personal use" is added. This field should be marked, if the protocol is for VAT for private use. The protocol will be included in the VAT Sales Ledger only.

→ G/L Account	60200	Разходи за външни услуги		0	0,00	0,00	0,00	ZVAT PROT	VAT20	45320

Note: the system makes the following checks:

- The field "VAT for personal use" is checked in VAT posting groups combination (VAT posting setup);
- The field "VAT for personal use" is checked in the VAT purchase protocol header, tab General

Only if these two fields are checked, the VAT protocol for VAT for personal use will be posted.

If only one of the fields is checked, the system displays a warning message for a discrepancy and does not allow posting until the discrepancy is rectified:

There is difference between the settings for Personal Use in the VAT Posting Setup ZVAT PROT - VAT20 compared to the field in the protocol header.

OK

Note: When creating a **Purchase Protocol**, it is advisable that the **Copy document** function is used and the **Include Header** field is checked. Thus, the type and number of the copied document are recorded in the **Purchase Protocol** header, in the fields **Original Document Type** and **Original Document No.** The content of these fields cannot be edited subsequently. If **Copy document** does not use checking of the **Include Header** field, then the fields in the protocol remain blank and in the printed form of the protocol the field **To document / Date** remains blank as well.

2.6. Set up VAT Cash Regime

The introduction of the VAT Cash Regime in the National Tax legislation is aimed at supporting small businesses that encounter difficulty to pay value added tax to the budget before they have received payment from their customers for the goods and services supplied by them.

The cash regime is applied in cases where there is a taxable supply at a rate of 20% VAT, payment is be made by bank transfer, the vendor and the recipient are registered pursuant to the Bulgarian VAT Act, and are not related parties.

The following steps should be followed to do the required setup in Dynamics 365 Business Central.

2.6.1. General Setup

You need to search for and open the **General Ledger Setup** page.

✓ Saved

General Ledger Setup

General Posting VAT Bank Journal Templates More options

General [Show less](#)

Allow Posting From		Pmt. Disc. Excl. VAT	☐
Allow Posting To		Adjust for Payment Disc.	☐

Inv. Rounding Precision (LCY)	0,01	Tax Invoice Renaming Threshold	0,00

You must check the fields **Unrealized VAT** and **Prepayment Unrealized VAT**.

2.6.2. Create new VAT Business Posting Group

After **Unrealized VAT** check box is selected, the **VAT Business Posting Groups** page opens.

In the example below, the ZKasova group is created (the name is user-selectable). In the column **Article 151**, the group for cash payments must be checked.

Once the VAT combination is set up, the new VAT business posting group must be entered in the card of Cash registered suppliers. Thus, for each purchase, the invoice will automatically load this VAT Business Posting Group and the system will identify the invoice and payments on it as Cash.

2.6.4. Change a VAT Group in invoices when paying in cash

When an invoice is entered for supply by a vendor registered under this regime, and if it is a cash invoice, you need to consider it as a regular invoice. For this purpose, in the invoice you need to change the **VAT Business Posting Group** from the one indicated as VAT Cash Group, to one that is standard for Bulgarian vendors.

The above change is made in the header of the Purchase Order / Purchase Invoice in the **Invoice Details** section.

← Purchase Order ✎ + 🗑

VAT Registration No.		VAT Bus. Posting Group	ZKASOVA
Identification No.	9999999999	Payment Terms Code	

From the list of **VAT Business Posting Groups** the required group is selected. After the group is changed, the program displays a warning message in which you must select "Yes".

If you change VAT Bus. Posting Group, the existing purchase lines will be deleted and new purchase lines based on the new information in the header will be created.

Do you want to continue?

Yes No

Note: It is advisable to change the **VAT Business Posting Group** before you start populating the lines in the purchase order / invoice. If an account has already been entered along the lines, the amount will be deleted and you need to re-enter it. If an item has been entered and a manual correction has been made to the price or discount in the line, they must also be re-entered.

When posting a document, the system displays a warning message to prevent accidental error when groups are changed. If it is a cash payment, reply to the message with "No".

You have selected Provider registered under Article 151 of the VAT Act. If you are paying cash you should have changed "VAT bus. posting group" in the header of the document. Are you sure in the correctness of the data?

Yes No

2.6.5. Reflect payments for invoices under Cash Regime

When an invoice is posted under the Cash regime, the VAT on it is posted to a separate account. When the Invoice is linked to the Payment, the amount is automatically transferred from this account to the VAT account. The date on which the transaction is posted is the date on which the payment is linked. The invoice can be linked to the payment before the Protocol for this payment has come. It is advisable that the linking should be made in the payment and not in the invoice.

2.6.6. Enter protocols for payment of invoices under Cash Regime

The protocol is entered from the **Vendor Ledger Entries (Vendor Card - Entries)**. You must select the invoice for which a Protocol has been received. After you mark the invoice, you need to select the **Protocols input** option from the **Functions** button.

V0001 - Тестови доставчик

→ 27.4.2021 г. | Protocols input

All entries for payments of the respective invoice are displayed. In the fields **Protocol Date** and **Protocol No.** the date and number of the protocol must be entered. An invoice can be paid with several protocols. The protocols entered so far to the selected invoice will also be displayed in this screen.

VAT Entries

Search | Edit List | Find entries... | Open in Excel | More options

Entry No.	Country/Regi... Code	EU 3-Party Trade	Clos...	Closed by Entry No.	Internal Ref. No.	SAD No.	Do not incl... in	Protocol Date	Protocol No.
→ 62	BG	☐	☐	0			☐		

After you enter the date and number, you must close the screen. The protocol date must be within the month in which the entry was linked, otherwise the system will display an error message. The entry for the Protocol is reflected in the ledger in the month in which the entry is linked (date of accounting for VAT). In case of discrepancy in the months of linking and of protocol, you need to unlink the payment from the invoice and link it again with a date of the month in which the protocol was issued. The generation of the VAT ledgers and the VAT Monthly declaration is done in the standard way.

2.7. VAT Setup when carrying out activities under Art. 163

According to the Bulgarian legislation, special VAT reverse charge schemes have been introduced when reflecting transactions involving waste and cereals and industrial crops. Reverse charging is a specific tax tool in which tax is charged by the recipient and not by the vendor. The mechanism requires that the tax is chargeable to the recipient in the transaction, who must be a VAT registered person, regardless of whether the vendor is a VAT registered person or not. In connection with these requirements in Dynamics 365 Business Central, you need to make the following settings.

2.7.1. Create new VAT Product Posting Groups

You need to create new **VAT Product Posting Groups**. Using the search button we can find this page in the menu:

In the example below the groups VAT_GRAIN and WASTE are created.

VAT Product Posting Groups ✓ Saved

Code ↑	Description
VAT_GRAIN	Зърно и техн.култури по чл.163а, ал.2 от ЗДДС
→ VAT-E163	Отпадък по чл.163

2.7.2. Set up a combination of VAT groups in Sales

In **Posting Setup**, the following settings are made for the new groups:

CUST BG - Клиенти BG ✓ Saved

VAT Bus. Posting Group ↑	Sal... VAT Un... Ac...	Purchase VAT Account	Purch. VAT Unreal. Account	Re... Ch... VAT Acc.	Re... Ch... VAT Un...	VAT Clause Code	EU Serv...	Tax Category	Specific purchase par.163a	Doc... with hea... info	Transaction Type	Purchase VAT Refund Type	VAT Classification Code	Corr. Sales VAT Account	Calc... VAT for Pers...
→ CUST BG	⋮	*					☐		02	☐	Sales	Full Refund	00		☐
CUST BG							☐		01	☐	Sales	Full Refund	00		☐

A combination of a **VAT Business Posting Group** of customers from Bulgaria and the new **VAT Product Posting Groups** is selected. The fields are filled in as follows:

- **VAT calculation type** – VAT
- **VAT %** - 0
- **Sales VAT Account** – xxxxx
- **Transaction Type** – Sales
- **Specific Purchase Art.163a** – 01 or 02
- **VAT Classification Code** – 00

A new column **Specific Purchase Art.163a** has been added. Code 01 is entered against the combination for the sale of waste, and code 02 - against the sale of cereals.

Code	Description
01	Supply under part I, appendix 2 of the VAT Act
02	Supply under part II, appendix 2 of the VAT Act

When selling items that are included in this group, you need to change the **VAT Product Posting Group** in the item card. When you select income G/L account in the lines of the sales document, it is good to have an account with this kind of a **VAT Product Posting Group**. In case you decide to use the same account for the sale of taxable and non-taxable sales, then you need to change the **VAT Product Posting Group** in the lines of the Sales Order / Sales Invoice.

2.7.3. Set up a combination of VAT groups in purchases

In this case, the tax is charged by the recipients of the supplies by issuing a protocol. The protocol may be common to all supplies for which the tax has become chargeable in the relevant tax period, when the suppliers are non-taxable physical persons. Invoices for reverse charge supplies must specify as a ground for issue "reverse charge under Art. 163a (2) of the VAT Act".

Reverse charge is not applied to Intra-Community supplies and acquisitions (supplies from and to Bulgarian persons with counterparties from EU Member States), in the case of tripartite transactions, imports and zero-rated supplies of goods outside the territory of the European Union.

In the **VAT Posting Setup** menu, the following settings are made for the new groups:

VEND BG - Доставчици BG - регистрирани по ДДС

✓ Saved

VAT Bus. Posting Group	Sal... VAT Un... Ac...	Purchase VAT Account	Purch. VAT Unreal. Account	Re... Ch... VAT Acc	Re... Ch... VAT Un...	VAT Clause Code	EU Serv...	Tax Category	Specific purchase par.163a	Document with header info only	Transaction Type	Purchase VAT Refund Type	VAT Classification Code	Corr. Sales VAT Account	Calc... VAT for Pers...
→ VEND BG	:	45310					☐		02	☒	Purchases	Full Refund	00		☐
VEND BG	:	45310					☐		01	☒	Purchases	Full Refund	00		☐

A combination of **VAT Business Posting Group** of suppliers from Bulgaria and the new **VAT Product Posting Groups** is selected. The fields are filled in as follows:

- **VAT Business Posting Group** – Supplier from Bulgaria;
- **VAT calculation type** – VAT;
- **VAT %** - 0;
- **Purchases VAT Account** – xxxxx;
- **Transaction Type** – Purchases;
- **Document with header info only** – Yes;
- **Specific Purchase Art.163a** - 01 or 02
- **VAT Classification Code** – 00;

If posting of the supply is directly to a general ledger account, you need to change the **VAT Product Posting Group** in the line of the purchase document.

When you purchase an item that is set up as waste or cereals, the document must be included in the VAT ledger without amount.

2.7.4. Reverse charge protocol

For reverse charge protocols, a new combination needs to be added that includes a **VAT Product Posting Group**.

In the **VAT Posting Setup**, the following settings are made for the new groups:

ZVAT PROT · ДДС Протокол

ZVAT PROT		45310		45320			☐		01	☐	Both	Full Refund	02		☐

A combination of **VAT Business Posting Group** for VAT protocols and the new **VAT Product Posting Groups** is selected. The fields are filled in as follows:

- **VAT calculation type** – Full VAT;
- **VAT %** - 20;
- **Sales VAT Account** – xxxxx;
- **Purchases VAT Account** – xxxxx;
- **VAT Refund Account** – xxxxx;
- **Transaction Type** – Total;
- **Specific Purchase Art.163a** – 01 or 02;
- **VAT Classification Code** – 02;

A new **"Ground for Issue"** of a reverse charge protocol is entered - **"VAT reverse charge Art.163a (2) of the VAT Act"**, as well as a new **"Ground for Non-issue of VAT"** - **"VAT reverse charge Art.163a (2) of the VAT Act"**.

Note: When posting a Protocol for waste or cereals, you need to change the **VAT Product Posting Group** along the lines. If not changed, the protocol will be displayed in the ledger without the required details.

If the Postponed VAT field is marked, a check mark is automatically placed in the Do Not Include in VAT field.

If the check mark in the Postponed VAT field is removed, the check mark in the Do Not Include in VAT field is also automatically removed.

When the invoice is posted, the tax credit will be reflected in the G/L account in the Postponed VAT Account field in BG, VAT and VIES Setup. In the VAT Entries filtered by the document number, there is a check mark in the Postponed VAT field and Do Not Include in VAT Ledgers.

2.8.3. Postponed VAT on a posted invoice

A purchase VAT ledger opens and the invoices that must enter the Journal for the selected month are generated. After generation, the Postponed VAT function can be started:

VAT Purch. Ledger

	2 000,00	400,00	01	22222	PI17-00057	20.4.2024 r.	BG1314766...

After this action on a screen, the VAT journal lines are displayed and by placing a check mark for the invoices to be included in the VAT ledger of purchases in the next period:

FBG Purch. VAT Ledger Lines

[Search](#) [Analyze](#) [Edit List](#) **Approve Postpone VAT** | **More options**

Postpone VAT

	Base	Amount	Document Type	Document No.	Original Document No.	Issue Date	Contracting Agent ID No.	
→	☐	2 000,00	400,00	01	22222	PI17-00057	20.4.2024 r.	BG1314766...
	☐	500,00	100,00	01	33333	PI17-00058	1.6.2023 r.	BG1314829...

When postponed VAT invoices are marked, the Approve Postpone VAT function is selected. In this action, the following occurs:

- For the selected invoices, a general ledger entry is made automatically, through which the amount of VAT on an invoice is transferred with an operation
 - o Debit account VAT purchases / Credit account Postponed VAT (minus sign)
- Selected invoices are removed from the purchase journal
- Place a check mark automatically in the postponed VAT and Do Not Include in VAT Ledger field on VAT Entries and the posted purchase invoice.

2.8.4. Use of postponed tax credit

To include a purchase invoice whose VAT has been postponed with the function described above, you must start the Change VAT Period page by selecting Change VAT Period from the Search button:

A list of documents marked with Postponed VAT that are not yet included in the VAT Ledgers is displayed on the screen.

Cha... VAT Peri...	Entry No. ↑	VAT Bus. Posting Group	VAT Prod. Posting Group	VAT Date	Posting Date	Document No.	Document Type	Type
→ ☐ ⋮	44	VEND BG	VAT20	7.5.2024 r.	7.5.2024 r.	PI17-00060	Invoice	Purchase
☐	45	VEND BG	VAT20	7.5.2024 r.	7.5.2024 r.	PI17-00061	Invoice	Purchase

By placing a check mark in the Change VAT Period field (first column), select the documents to include in a selected VAT period. The selection is confirmed by the Change VAT Period function in the ribbon above. The following window appears on the screen:

The screenshot shows a software interface for changing the VAT period. At the top, there's a title bar 'Change VAT Period' with a 'Saved' status and some icons. Below it is a toolbar with 'Search', 'Analyze', 'Edit List', 'Change VAT Period', 'Automate', and 'Fewer options'. The main area contains a table with the following columns: 'Cha... VAT Peri...', 'Entry No. ↑', 'VAT Bus. Posting Group', 'VAT Prod. Posting Group', 'VAT Date', 'Posting Date', 'Document No.', 'Document Type', and 'Type'. The table has two rows of data. Below the table, there's a modal dialog titled 'New VAT Date For Posting'. It has a text input field labeled 'New Date For VAT' and a calendar icon. At the bottom of the dialog are 'OK' and 'Cancel' buttons.

Cha... VAT Peri...	Entry No. ↑	VAT Bus. Posting Group	VAT Prod. Posting Group	VAT Date	Posting Date	Document No.	Document Type	Type
→	44	VEND BG	VAT20	7.5.2024 r.	7.5.2024 r.	PI17-00060	Invoice	Purchase
	45	VEND BG	VAT20	7.5.2024 r.	7.5.2024 r.	PI17-00061	Invoice	Purchase

The first day of the month in which the marked invoice is to be included should be indicated here.

The system includes the invoice in the relevant month and creates entries for the transfer of the VAT amount from the Postponed VAT account to the VAT account for the purchases. These automatically generated records can be found in the journal and folder selected in the setting from item 2.8.1. After reviewing the suggested entries, you can post them by selecting the Post button from the relevant journal.

When creating/refreshing the VAT ledger, the selected invoice will be displayed in the relevant ledger.

3. Intrastat

Intrastat is the system for collecting information on Intra-Community dispatches and / or arrivals of goods made between the Republic of Bulgaria and the EU Member States. Companies obliged to submit Intrastat declarations, namely, Intrastat operators, are those companies registered under the Value Added Tax Act, who carry out Intra-European Union trade with goods in annual volumes of a value above the declaration thresholds. Intrastat operators are obliged to submit a monthly Intrastat declaration.

Below are some standard features of the system, as well as additions to the Localization package for Bulgaria, which help with Intrastat reporting.

3.1. Intrastat Setup

The data required for Intrastat declarations are reduced to the fields below. Some of the data can be set in advance and filled in by default in the documents.

Example:

Country /Region Code	Country /Region of Origin Code	Transaction Type	Transport Method	Shpt. Method Code	Area	Transport Country/Region Code	Quantity	Net Weight	Amount	Tariff No.
DE	DE	11	3	CPT	VAR	DE	3	10	250	90184990

3.1.1. General Setup

The following fields are entered in advance in the **Vendor card**:

- **Country/Region code**
- **Shipment Method Code**
- **Transaction Type**
- **Transport Method**

--	---

Intrastat

No Item Charges in Intrastat ☐

- **Report Receipts** – to be checked if needed to generate a declaration for receipts only
- **Report Shipments** – to be checked if needed to generate a declaration for shipments only
- **Default Transport Type** – specify the default transaction type for shipping notes and purchase receipts (11 Standard Purchase / Sale)
- **Default Transport Type – Returns** – specify the default transaction type for the return of shipping notes and purchase receipts (11 Standard Purchase / Sale)
- **No Item Charges in Intrastat** – if checked, the system does not allow the additional cost to be included in the amounts for Intrastat transactions
- **Default Country / Region code** - specify the default receiving country code. The field is populated by default with the value of the **Shipping Country/Region Code** field from **Company Information**

The system has built-in checks for filling in the Intrastat required fields when posting an EU document and the document includes an item. In the Intrastat declaration the data for the Tariff No. and Net Weight is taken from the Item Card, and the Country of Origin - from the Purchase Receipt and the Sales Shipment. The Item Country of Origin is transferred to these documents from the Item Card, but it can be changed in them. If not entered in the Receipt or Shipment documents, the country code will not enter the ledger either.

3.1.2. Checkmark countries, subject to Intrastat declarations

When filling in an Intrastat declaration, a nomenclature of countries and territories is used, or the so called Geonomenclature, according to Commission Implementing Regulation (EU) 2020/1197. In Dynamics 365 Business central in the page **Countries/Regions** against each country you must fill in the corresponding code for Intrastat.

Countries/Regions

Code ↑	Name	ISO Code	ISO Numeric Code	Address Format	Contact Address Format	County Name	EU Country/Region Code	Intrastat Code	VAT Scheme
→ AE	Обединени Арабски Емирства			City+Post Code	After Company ...				
AT	Австрия			Post Code+City	After Company ...		AT	AT	AT:VAT
AU	Австралия			City+County+Po...	After Company ...				
BE	Белгия			Post Code+City	After Company ...		BE	BE	BE:VAT
BG	България			City+County+Po...	After Company ...		BG	BG	BG:VAT
BN	Brunei Darussalam			City+Post Code	First				

Subject to Intrastat declaration are the entries for items that are delivered / sold to counterparties of a country with an Intrastat code in the table of countries (regardless of the country of origin of the items).

3.1.3. Intrastat nomenclatures

In Finance - Setup - Intrastat, there are all specific nomenclatures that are used in generating an Intrastat declaration. Because they are part of the standard Dynamics 365 Business Central package, completing and setting them up is not covered in this documentation.

These nomenclatures can also be found by typing part of the name in the Search field on the main menu.

3.2. Creating a new Intrastat declaration

A new Intrastat declaration is created from the **Intrastat Report List** page.

In the list of created declarations, select the **+New** action.

In the **General** section of the header of the declaration, the following fields are filled in:

- **Description** – name of the declaration
- **Statistical Period** – is entered by first writing the last two digits of the year and then the month for which the declaration will be submitted. Example of Statistical period: 2501 - January 2025
- **Declaration Type** – must be selected Original
- **Subsequent Declaration No.** – 1.

It is necessary to check for missing data. If there are any, they can be filled in manually in the journal. The other option is to fill them in the relevant cards (items, vendors, etc.), and then run the Suggest Line action again. It is recommended for the items to be filled in with net weights and tariff numbers (in their cards) in advance. Without these fields, the declaration will not be submitted correctly.

In the table Item Ledger Entries there are some additional fields related to Intrastat transactions such as - tariff number, customs declaration, net weight, country of origin, country of transport, method of transport, etc. They can be used for additional reporting.

It is advisable to check the value of the declaration as well. The following check is possible: In Item Ledger entries items to be filtered by the respective posting period, Record type (Purchase) and by Country / region code (<> " & <> BG). The column Cost amount (actual) is compared with the value of the declaration - Statistical value.

The amount in Cost amount (actual) includes transport costs, if such are allocated as item charges in purchase orders.

3.3. Creating files for Intrastat declaration

After the data in the declaration lines have been verified, they are exported using the **Create file** action. Localization allows both creating a file with a ready Intrastat declaration and creating only transaction files that can be loaded into the Intrastat program and from there the declaration can be submitted. In this case, the **Export transactions only** option is used.

If the declarations must include a statistical value, the **Export Statistical Value** option is also marked.

4. Finances – localization settings

The Localization package for Bulgaria supports additional functionalities that upgrade the main Finance module in Dynamics 365 Business Central.

4.1. Automatic Create Default Dimensions

Every time you create a new customer or vendor, the automatic creation of dimension helps to enter the value of dimensions.

To set up this you need:

- to search in the **General Ledger Setup** menu
- to complete in **Create Default Dimensions** section:
 - **Table Customer** - in the Dimension field select Dimension for Customer (it must be created in advance).
 - **Table Vendor** in the Dimension field select Dimension for Vendor (it must be created in advance).

General Ledger Setup

General Posting VAT Bank Journal Templates More options

General >

Dimensions >

Create Default Dimensions Show less

Table Customer	Table Vendor
Dimension	Dimension
CONTRAGENT	CONTRAGENT

When you create a new customer or vendor card, the system automatically generates value in dimensions with the code and name of that customer or vendor. When you change the name in customer / vendor card, it also changes in the dimensions.

When you create a new customer or vendor, the system automatically adds the created dimension to their cards. When the customer or vendor is used in transactions, dimension is copied along the lines. This allows the generation of detailed reports and Analysis by dimensions.

4.2. General Journal

The following fields have been added to the General Journal:

- **SAD No.** – related to the option to post customs declarations;
- **VAT Subject** – the description of the transaction (good or service) is filled in which is reflected in the **VAT Purch. Ledger List** in the column **VAT description**. If left blank, it will be filled in with the value of **VAT description of purchases** field from page **BG, VAT and VIES setup**

4.3. Trial Balance Register

The Trial Balance Register report is a further developed report, which serves to present the data on accounts in a way that makes it easy to track the opening balance, the turnover for the respective period (debit and credit) and the closing balance.

You can start the report from the main screen of the Accountant Role Center:

or by searching the menu:

Tell me what you want to do

trial balance reg

Cancel

- **From Date** – start date of the period
- **To Date** – end date of the period
- **Include Closing** – if you want to include records after closing of accounts

- **Type** – Synthetic or Analytic. The Synthetic Trial Balance shows the accounts of the Total type, when similar accounts have been set up in the Chart of accounts. For example, if several accounts from group 602 have been entered and account 60290 has been created as a totaling account, which is specified as of Total type, and the Indent function was used for the summation (begin-total – end-total), then only account 60290 will be displayed in the report. Account 60290 will not be displayed in the Analytic Trial Balance, but all accounts included in the summation.
- **Additional Currency** – specified when an additional reporting currency is used
- **For export (no lines)** – lines are not printed in the report

Additionally, selected accounts can be specified in the **Filter: Account** section.

Upon confirmation by pressing the View button, the report is displayed on the screen:

4.4. Fixed assets

In addition to the reports in the Fixed Asset module, the Localization package for Bulgaria also provides reports developed for tax and accounting depreciation plans.

The **Changes in Fixed Asset** report contains all the information needed for Tax depreciation plan and Accounting depreciation plan. It is found in the main screen of the Accountant Role Center:

The screenshot shows the FTS software interface. At the top, there's a navigation bar with various modules like Finance, Journals, Cash Management, etc. Below this, a secondary menu lists specific reports and functions. The 'Changes in Fixed Asset' report is highlighted with a red box. The main area of the screen displays a 'Good afternoon!' headline and a list of activities on the right side.

or by searching the menu:

This screenshot shows a search interface. At the top, there's a text input field with the placeholder 'Tell me what you want to do'. Below it, a search bar contains the text 'changes in fixed'. A dropdown menu is open, showing a list of results. The first result, 'Changes in Fixed Asset', is highlighted with a red box. To the right of this result, the text 'Reports and Analysis' is visible. Below the search results, there's a link that says 'Didn't find what you were looking for? Try exploring'.

The following options in the report must be filled in:

This screenshot shows the configuration screen for the 'Changes in Fixed Asset' report. The title 'Changes in Fixed Asset' is at the top left. Below it, there are several configuration options:

- Printer:** (Handled by the browser)
- Depreciation book:** COMPANY
- Start Date:** 1.1.2021 r.
- End date:** 31.12.2021 r.
- Общ сбор за група:** (empty dropdown)
- With details for FA:** (toggle switch, currently off)
- Filter: FA Posting Group:**
 - × Code: (empty dropdown)
 - × Acquisition Cost Account: (empty dropdown)
 - + Filter... (link)

 At the bottom of the screen, there are four buttons: 'Send to...', 'Print', 'Preview & Close', and 'Cancel'.

- **Depreciation book** – Depreciation book is selected – accounting or tax;
- **Start Date** – start date of the period;
- **End Date** – end date of the period;
- **Group grand total** – one of the totaling options must be specified - by FA class, FA subclass, FA location or global dimensions;
- **With details for FA** - if you do not check this option, only the totaling rows under the above-mentioned option **Group grand total** will be displayed. When checked, rows will be displayed for each fixed asset and grand total under the Group grand total option.

In the tabs **Filter: FA Posting groups** and **Filter: Fixed asset**, filters for certain fixed assets or their groups can be specified.

Note: Due to the fact that you cannot fit all columns on one page for printing, it is advisable to export the report to Excel where all required columns are visible.

4.5. Changes in posting with Deferral Templates

In Deferral Templates two new fields were added:

Deferral Template Card

✓ Saved

03M

General

Deferral Code	03M	Use Account For Chan...	☒
Description	Разсрочване за 3 месеца	Account For Change	
Deferral Account	61300		

Deferral Schedule

Deferral %	100	No. of Periods	3
Calc. Method	Straight-Line	Period Desc.	Разсрочване за 3 месеца
Start Date	Posting Date		

- **Use Account For Change** – If there is no mark in the field, the deferral process will be standard. If there is a mark in the field, deferral process will use the GL account from the following field.
- **Account for change** – field should be filled with the account which deferral uses when posting the invoice transaction. Those transaction are explained in details below.

EXAMPLES in PURCHASES

The standard deferral process expects the expense account to be inserted in the purchase line. The same account will be used for deferral the expense in the certain schedule. In the deferral template we include the account for Future expenses. Transactions are as follows:

- Debit account Expenses account (starting with 60* in BG chart of account) / Credit account for vendors with the amount of 100 (posted with the Posting date)
- Debit account for Deferral expense (65* for BG chart of account) / Credit account for expenses account (starting with 60* in BG chart of account) with the amount of 100 (posted with the Posting date)
- Debit Expenses account (starting with 60* in BG chart of account) / Credit Deferral account (65* for BG chart of account) posted with the dates from the schedule

The change, related to this development, is as follows:

- Debit **Account for change** (the new field in Deferral Template) / Credit Vendor account with the amount of 100 (posted with the Posting date)
- Debit Deferral Account from the Deferral Template (65* for BG chart of account) / Credit **Account for change** (the new field in Deferral Template) with the amount of 100 (posted with the Posting date of the invoice)
- Debit Expenses account (starting with 60* in BG chart of account) / Credit Deferral account from the Deferral Template (65* for BG chart of account) with the dates from the Deferral schedule.

When posting the invoice transaction, system uses the Account for change from the Deferral Template, but the actual deferral of the expense will use the exact Expenses account from the purchase lines and the Deferral account from the template.

EXAMPLE in SALES

The standard deferral process expects the income account to be inserted in the sales line. The same account will be used for deferral the income in the certain schedule. In the deferral template we include the account for Deferral (future) income. Transactions are as follows:

- Debit Customers account / Credit Income account (703 in BG chart of account) with the amount of 100 (posted with the Posting date of invoice)
- Debit income account (703 in BG Chart of account) / Credit Deferral account (75* in BG Chart of account) with the amount of 100 (posted with the Posting date of the invoice)
- Debit Deferral account (75* in BG Chart of account) / Credit income account (703 in BG Chart of account) with the dates from the Deferral Schedule

The change, related to this development, is as follows:

- Debit Customer account / Credit **Account for change** with the amount of 100 (posted with the Posting date of invoice)
- Debit **Account for change** / Credit Deferral account (75* from BG Chart of account) with the amount of 100 (posted with the Posting date of invoice)
- Debit Deferral account / Credit Income account from the lines with the dates from the Deferral schedule

When posting the invoice transaction, system uses the Account for change from the Deferral Template, but the actual deferral of the income will use the exact Income account from the sales lines and the Deferral account from the template.

4.6. Customs declaration data table

To store data for customs declarations, a table has been created with the following fields:

SAD No. ↑	Vendor No.	Vendor Name	Purchase Invoice No.	Update Purchase Invoice
→ 228G005100613620R24	V0007	Customs Varna	PI17-00010	☐

- **SAD No** - Customs Declaration Number
- **Vendor No** - vendor number that is used in the document with the posted amount of VAT for the respective supply
- **Vendor Name** – Vendor Name

- **Purchase invoice No.** - number of the purchase invoice to which the customs declaration relates. It is selected from the list of posted purchase invoices, and the list is filtered by the vendor number from the field **Vendor No.**
- **Update purchase invoice** - when marked, the SAD number will be recorded in the specified posted purchase invoice.

Features:

- The table can be accessed through field **SAD No.** on the General Journal Line
- In the records for SADs, it is possible to fill in a vendor invoice number – in the field **Purchase Invoice No.** When filling in this field and marking the box **Update Purchase Invoice**, the number of the customs declaration is filled in field **SAD No.** of the respective posting invoice.
- The number of the customs declaration specified in the purchase document is recorded in the data table for customs declarations when the document is posted, together with the number of the corresponding purchase invoice.
- When updating data in a posted purchase invoice, you can add or change the SAD number. In this case, the list of entered SADs is opened, and the list is filtered by the vendor number from the posted invoice. If a customs declaration number has already been entered in the invoice, the system displays a warning message when you try to change it.
- The customs declaration table does not store data on SADs that were reflected before the new table was implemented. If necessary, data on them can be additionally imported into the system.

Important: The method of posting a customs declaration depends on the settings in the system and is not subject to consideration in this documentation.

5. Purchases – localization settings

The localization package for Bulgaria has some additional settings in the Purchasing module.

5.1. Purchases & Payables Setup

In the **Purchase & Payables Setup** there are some additional fields related to VAT protocols for purchases and Intrastat and also a setting for mandatory payment method code.

Purchases & Payables Setup

Payment Method mandatory

- **EU VAT Bus. posting group** – VAT business posting group linked to VAT protocols is filled in;
- **Intr. Jnl. Incl. Item charges** – it has to be checked if you want to include the additional charges in the Intrastat declaration
- **Payment Method mandatory** - specifies whether the Payment Method Code is mandatory for posting.

5.2. Vendor card

In the Vendor card there have been added some fields related to Intrastat transactions (Transport method, Transaction specification, etc.). When filling in these fields in the vendor card and upon selecting the vendor in the purchase document, they are transferred by default. For more details see the Intrastat section in the present document.

The system displays a page where you must enter the **Cancellation date**. Confirm by pressing the **Close** button.

Edit - Input date

Manage

Date

Close

The system displays the following message:

The purpose of this voiding is to show correctly the voided document in VAT ledgers in accordance with Bulgarian law. The voiding does not create any reversed entries. In order to void the entries a credit memo must be posted. Do you want to continue?

Yes

No

Upon pressing the **Yes** button, the document is marked as voided by the system. It will appear in the VAT ledger with zero value. To reverse the G/L postings, you must issue a Credit memo or Invoice which you must also void.

5.5.2. Cancellation of a posted document by automatically creating a correction document

If you need to void a document, you must open the posted purchase document. Under the **Home – Correct** menu you must select **Cancel**.

A warning message is displayed that the respective document will be canceled, and a corrective document will be created and posted. When an invoice is canceled, a corrective credit note is created and posted, and when a credit note is canceled, a corrective invoice is created and posted.

After confirming the action with the **Yes** button, opens a page in which the voiding date must be entered. The **Date** field is mandatory. The entered cancellation date is used as the date of posting the corrective document.

By selecting the **Close** button the creation and posting of the corrective document is performed. The canceled documents are marked **Yes** in the **Canceled** field, and the corrective documents are marked **Yes** in the **Corrective** field.

0000000228	C0079			2/19/2026	120.00	144.00	0.00	Yes	Yes	—		0	☐
0000000227	C0079			5/2/2026	120.00	144.00	0.00	Yes	—	Yes		0	☐
0000000226	C0079			4/28/2026	120.00	144.00	0.00	Yes	—	Yes		0	☐

If there is an error when creating and posting a corrective document, a message is displayed and no document is created.

Features:

- When a purchase invoice is canceled, the posting number of the newly created credit memo is the number series that is set to be used for credit memos.
- When a posted purchase credit memo is canceled, a corrective purchase invoice is created with the same posting number as the credit memo. Thus, both documents – original and corrective, have the same posting number.
- The system does not allow the re-cancellation of an already canceled document. With such an attempt, an error is displayed and the procedure cannot be started.
- A document created as a corrective document cannot be canceled. A warning message is displayed, and the procedure cannot be started.
- With the **Cancel** action, only an invoice that has not been paid (closed) or a credit invoice that is not associated with an invoice can be canceled.
- Documents on the VAT ledgers:
 - In cases where the dates of posting of the original and the corrective document are within one month, then in the VAT ledger the original document is displayed on one line with a value of zero – if the original document is an invoice, it is displayed with Document Type 01, if it is credit memo – with Document Type 03.
 - In cases where the dates of posting of the original and the corrective document are from different months, the corrective document is shown with the same type of document as the original, but the amount is reversed. More precisely, if an invoice is canceled, then the corrective document (credit) is displayed as an invoice (code 01) with a negative amount, and if it is canceled on credit, then the corrective invoice is shown as a credit invoice (code 03) with a positive amount
- In the printed form of a document canceled with the **Cancel** action, the text **VOIDED** is displayed.

5.6. Change of data in posted purchase documents

It is possible to change data in a posted purchase invoice and in a posted purchase credit memo. The change is made from the posted document page

5.6.1. Update a posted purchase invoice

If you need to update a document, you must open the posted purchase invoice. Under the **Actions – Other** menu you must select **Update Document**.

On the Posted Purch. Invoice - Update page, you can update the data in the following fields:

OK Cancel

Confirm with **OK** to update the data.

5.7. Void a purchase invoice in next tax period

When a vendor void an invoice that has been posted and data was exported in files for submission to the tax administration, the cancellation must be reflected in a next tax period.

It is necessary to issue a new Purchase Credit Memo. Enter the number of the posted invoice that has been canceled in Vendor Cr. Memo No and check the "Credit Memo for Invoice Voiding".

In this way, the posted credit memo will be reflected in the VAT ledger entries with code 01.

6. Sales – localization settings

The Localization package for Bulgaria adds the following settings in the Sales and Marketing module.

6.1. User setup

User Setup ✓ Saved

Search + New Edit List Delete Open in Excel **Actions** Fewer options

New Document

Card Usersetup

m	Posting To	Time	Code	Filter	Ctr. Filter	Ctr. Filter	Ad...

In the **User setup – Card Usersetup** page there is an additional field called **Posting date <> Work date**. If this field is checked, the system will not check for differences between the posting date and work date when an order or a sales invoice is posted.

The **Edit Sales document's price and discounts** field allows you to restrict a user from editing prices and discounts along the lines of the sales document. By default, users are created with their edit rights disabled. In this case, they can only select Item along the lines of the sales document. If users need to have edit rights, you must select the option **Full Access**.

Permissions

Posting Date <> Wor... ☐

Edit Sales document'... Full Access

6.2. Sales & Receivables Setup

The following fields have been added to the page **Sales & Receivables Setup**:

Number series tab

- **Sales Protocol Nos.** - number series for the Sales protocol before posting
- **Posted Sales Protocol Nos.** - number series for the Sales protocol after posting

They are included in the VAT Sales journal under code 81.

Specific Settings tab

- **Intr. Jnl. Incl. Item charges.** - If item charges need to be included in the Intrastat journal for shipments, you must check this option
- **Payment Method mandatory** - specifies whether the Payment Method Code is mandatory for posting.

6.9. Sales protocol

Like Sales invoices, Sales protocols have a list of unposted protocols.

The protocol is displayed as a sales invoice, but it is in a separate list and is marked as protocol. Once posted the protocols are stored in the list of posted invoices and can be identified as Sales protocols by the check in the Sales Protocol field. Their number series for posting must not coincide with these of invoices. Filling them in is similar to filling in a Sales invoice. This type of document is presented under code 81 in the VAT sales ledger.

The protocol is printed in a similar printed form like the Invoice, but is titled Sales protocol.

Contact	Ivan Ivanov	Sales Protocol	☐
Posting Description	Order SO17-00018	Cancelled	No
Composed By		Closed	☐
Posting Date	21.6.2021 r.	Void	☐
VAT Date	21.6.2021 r.	Void Date	
Due Date	21.6.2021 r.		

The system displays a page where you must enter the **Cancellation date**. Confirm by pressing the **Close** button.

Edit - Input date

Manage

Date

Close

The system displays the following message:

The purpose of this voiding is to show correctly the voided document in VAT ledgers in accordance with Bulgarian law. The voiding does not create any reversed entries. In order to void the entries a credit memo must be posted. Do you want to continue?

Yes

No

Upon pressing the **Yes** button, the document is marked as cancelled by the system. It will appear in the VAT Sales Ledger with zero value. To reverse the G/L postings, you must issue a Credit memo or Invoice which you must also cancel.

6.10.2. Cancellation of a posted document by automatically creating a correction document

If you need to void a document, you must open the posted sales document. Under the **Home – Correct** menu you must select **Cancel**.

The system displays a page where you must enter the **Cancellation date**. The **Date** field is required. The entered cancellation date is used as the date of posting the corrective document.

By selecting the **Close** button, a warning message is displayed that the respective document will be canceled and a corrective document will be created and posted. When an invoice is canceled, a corrective credit note is created and posted, and when a credit note is canceled, a corrective invoice is created and posted.

After confirmation with the **Yes** button the creation and posting of the corrective document is performed. The canceled documents are marked **Yes** in the **Canceled** field, and the corrective documents are marked **Yes** in the **Corrective** field.

No.	Sell-to Customer No.	Customer Name	Currency Code	Due Date	Amount	Amount Including VAT	Remaining Amount	Paid	Canceled	Corrective	Location Code	No. Printed	Void
0000000231	C0079			5/20/2026	240.00	288.00	0.00	Yes	Yes			0	☐
0000000228	C0079			2/19/2026	120.00	144.00	0.00	Yes	Yes			0	☐
0000000227	C0079			5/2/2026	120.00	144.00	0.00	Yes	Yes			0	☐
0000000226	C0079			4/28/2026	120.00	144.00	0.00	Yes	Yes			0	☐

If there is an error when creating and posting a corrective document, a message is displayed and no document is created.

Features:

- When an invoice for sale is canceled, the posting number of the invoice is used as the posting number of the newly created corrective document – credit note.
- When a posted sales credit note is canceled, a corrective sales invoice is created with the number of the posted credit note.
Thus, the two documents – original and corrective, have the same posting number.
- The system does not allow the re-cancellation of an already canceled document. With such an attempt, an error is displayed and the procedure cannot be started.
- A document created as a corrective document cannot be canceled. A warning message is displayed, and the procedure cannot be started.
- With the **Cancel** action, only an invoice that has not been paid (closed) or a credit invoice that is not associated with an invoice can be canceled.
- Documents on the VAT ledgers:
 - In cases where the dates of posting of the original and the corrective document are within one month, then in the VAT sales ledger the original document is displayed on one line with a value of zero – if the original document is an invoice, it is displayed with Document Type 01, if it is credit memo – with Document Type 03.

- In cases where the dates of posting of the original and the corrective document are from different months, the corrective document is shown with the same type of document as the original, but the amount is reversed. More precisely, if an invoice is canceled, then the corrective document (credit) is displayed as an invoice (code 01) with a negative amount, and if it is canceled on credit, then the corrective invoice is shown as a credit invoice (code 03) with a positive amount
- In the printed form of a document canceled with the **Cancel** action, the text **VOIDED** is displayed.

6.11. Change of data in posted sales documents

It is possible to change data in a posted sales invoice and in a posted sales credit memo. The change is made from the posted document page.

6.11.1. Update a posted sales invoice

If you need to update a document, you must open the posted sales invoice. Under the **Actions – Other** menu you must select **Update Document**.

On the Posted Sales Inv.- Update page, you can update the data in the following fields:

Invoice Details tab

- Do not include in VAT Ledgers – you can update the field Do not include in VAT Ledgers

Payment tab

- Payment Method Code – you can update the Payment Method Code field
- Payment Reference – you can update the field Payment Reference
- Company Bank Account Code – you can update the Company Bank Account Code
- Bank No.

If an item has default dimensions for the Inventory Setup dimension, but fills in the Category that has no dimension value from Inventory Setup, then the same dimension will be removed from the item card.

8. Irrecoverable Receivable

This point provides Dynamics 365 Business Central users with instructions for the required sequence of actions in the in the process of recording irrecoverable receivables for sales and purchases.

8.1. Irrecoverable Receivable for purchases

When entering a credit note for a purchase related to an irrecoverable receivable, a new field **Credit Memo according to art.126b, paragraph 1 of VAT Law** has been created in the header, where you can mark if the credit memo is related to an irrecoverable receivable:

Purchase Credit Memo

9. Receipt and expense cash receipts

The functionality for issuing Income Cash Receipts (PKO) and Expense Cash Receipts (RKO) offers the ability to set up and print cash receipts.

9.1. Bank Account Settings

The **Bank Account**, using which PKOs or RKO's will be issued, must be previously determined and marked. For this purpose, on the **Bank Account Card** page, in the **General** section, the field **Cash** must be marked.

Dynamics 365 Business Central

Bank Branch No. Cash

Bank Account No.

9.2. Journal Batches Settings

On the page **General Journal Batches** of **General Journals**, for the batch in which cash payment records will be posted and Income Cash Receipts or Expense Cash Receipts will be issued, the field **Print PKO or RKO** must be marked:

9.3. Expense Cash Receipt

On the page **General Journals**, select the **Batch** that is marked in the field **Print PKO or RKO**.

The following fields are filled in the journal lines:

- **Posting Date** – fill in the payment date
- **Document No.** – fill in the cash receipt number
- **Document type** – select **Payment**
- Important: If the value of the **Document Type** field is different from **Payment**, the system will not allow posting.
- **Account type** – select **Vendor**
- **Account No.** – select the vendor number for whom the payment is reflected, from the list of vendors
- **Bal. Account Type** – select **Bank Account**
- **Bal. Account No.** – select a **Bank Account No.**, that is marked in the field **Print PKO or RKO**, from the list of Bank Accounts
- **Amount** – fill in the payment amount
- **Form/Payment Form: Name** - fill in the name of the person who received the amount. If a vendor is selected, the default value will be filled in with the name of the vendor. If you need to change, the field can be edited and a different name can be entered.

The contents of these fields are used in the printed form of the cash order.

If there is already a posted purchase invoice that reflects the payment in the journal, you can use the action **Apply Entries** and specify the corresponding invoice.

On the page **Apply Vendor Entries**, on the line of the document to which the payment will be linked, click the field **Applies-to ID** and then select **Set Applies-to ID** action. Then select the OK button.

Data will be extracted from the selected related document, which will be entered in the report – the printed form of the cash receipt:

- Document Type
- Document No.
- Posting date
- Amount
- Global Dimension 1
- Global Dimension 2

After filling in the data in the journal lines, during the **Posting** action, the system will automatically suggest that the receipt be printed.

In case it is not printed immediately, this can be done subsequently from the **Expense Cash Receipt** page.

The printed form of the **Expense Cash Receipt** is as follows:

- Test		BG831166152		
Money Order Payment		Cash-register code: KACA		
No.: 150733	Date: 30.12.2025	Kaca		
Deliver to: Vendor 30				
Address: address 30/12 14:34:48				
ID card No., issued on, by:				
Letter of attourney No./ Date:				
Reason: Invoice	150304	30.12.2025	43,000.00 EUR	Office: МАГАЗИН File: ПЛОВДИВ
Paid: 43000.00 EUR				
In Words: (Forty three thousands and 0.00 EUR)				
Created by:	Chief Accountant:	Manager:	Amount delivered by:	Amount received by:
(signature)	(signature)	(signature)	(signature)	(signature)

Note: In case when posting the payment, a Bank Account is specified instead of a vendor, then in the printed form of the RKO in the field **Reason:** different information will be displayed. In this case, if the document is printed separately, it must be done from the **Expense Cash Receipt (Cash)** page.

9.4. Income Cash Receipt

An **Income Cash Receipt** is issued similarly to the issuance of an **Expense Cash receipt**.

On the page **General Journals**, select the **Batch** that is marked in the field **Print PKO or RKO**.
The following fields are filled in the journal lines:

- **Posting Date** – fill in the payment date
- **Document No.** – fill in the cash receipt number
- **Document type** – select **Payment**
- Important: If the value of the field **Document Type** is different from **Payment**, the system will not allow posting.
- **Account type** – select **Customer**

- **Account No.** – select the customer number for whom the payment is reflected, from the list of customers
- **Bal. Account Type** – select **Bank Account**
- **Bal. Account No.** – select a **Bank Account No.**, that is marked in the field **Print PKO or RKO**, from the list of Bank Accounts
- **Amount** – fill in the payment amount
- **Form/Payment Form: Name** - fill in the name of the person who provided the amount. If a customer is selected, the default value will be filled in with the customer's name. If you need to change, the field can be edited and a different name can be entered.

The contents of these fields are used in the printed form of the **Income Cash Receipt**.

If there is already a posted sales invoice that reflects the payment in the journal, you can use the action **Apply Entries** and specify the corresponding invoice.

The data from the selected linked document will be used in the printed form of the cash receipt:

- Document Type
- Document No.
- Posting Date
- Amount
- Global Dimension 1
- Global Dimension 2

After filling in the data in the journal lines, during the **Posting** action, the system will automatically suggest that the cash receipt be printed.

In case it is not printed immediately, this can be done subsequently from the **Income Cash Receipt** page.

The printed form of the **Income Cash Receipt** is as follows:

Organization: - Test		VAT No. BG831166152	
Money Order Receipt
